Price Gains Pull Back on FHFA Index

The pace of home price increases, at least for purchases financed by Fannie Mae and Freddie Mac, slowed in April, falling below **even the most modest** of analysts' projections. The Federal Housing Finance Agency (FHFA) reports that prices rose 0.2 percent on a seasonally adjusted basis from the previous month. In March the increase was 0.8 percent, revised upward today from an originally reported 0.7 percent.

Analysts survey by Econoday had anticipated a month-over-month increase for April of 0.6 percent. The range of estimates was 0.5 to 0.8.

On an annual basis the index **appreciated 5.9 percent**, down from an annual gain of 6.1 percent in March. Since October 2015, the national house price index level has surpassed the prior peak level from March 2007.
